## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-2 and 4-20, drawn to a plant transformed with SEQ ID NO: 1, 3 or 5, classified in class 800, subclass 278 for example.
- II. Claim 3, drawn to an isolated protein, classified in class 536, subclass 23.1 for example.
- III. Claims 16-20, drawn to a method for increasing oil or other desired product in a plant wherein the plant is transformed with cDNA encoding NADP dependent malic enzyme, classified in class 800, subclass 282 for example.
- IV. Claims 21-26, drawn to a plant genetically manipulated for increased synthesis of oil or some other desired product comprising in its genome a cDNA encoding NADP dependent malic enzyme and a cDNA encoding pyruvate kinase, classified in class 800, subclass 298 for example.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are a plant transformed with a pyruvate kinase cDNA of Group I, a plant transformed with a NADP dependent malic enzyme cDNA of Group III, and a plant transformed with cDNA encoding NADP dependent malic enzyme and pyruvate kinase IV each having different transgenes encoding enzymes or combinations thereof resulting in different phenotypes.

Art Unit: 1638

Inventions I, III, IV and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are the transformed plants of Groups I, III and IV and the isolated polypeptide of

Claims 16-20 link(s) inventions I and III. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), claims 16-20. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

The claims of Group I and II are directed to 3 independent and distinct nucleic acid or 3 independent and distinct amino acid sequences. Upon election of Group I Applicant is required to elect a single nucleic acid sequence of SEQ ID NO:1, SEQ ID NO:3, or SEQ ID NO:5. Upon election of Group II Applicant is required to elect a single amino acid sequence of SEQ ID NO:2, SEQ ID NO:4, or SEQ ID NO:6. This requirement is not to be construed as a requirement for an

Art Unit: 1638

election of species, since each of the nucleic acid sequences or amino acid sequences recited in alternative form is not a member of a single structurally and functionally related genus, but rather constitutes an independent and patentably distinct invention. Separate searches and considerations would be required for examination of each of the nucleic acid sequences.

Because the inventions are distinct for the reasons given above and have required a separate status in the art as shown by their different classifications, recognized divergent subject matter, and because the search required for one of the groups is not required for another restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
